

GLOBAL
SUSTAINABLE
TRANSFER PRINTS

IS THE WORLD'S LARGEST PRODUCER OF SUSTAINABLE TRANSFER PAPERS AND FILMS

With over **40 years of experience**, we are one of the only print companies with every step of the production process under one roof and a seamless mix of rotogravure and digital printing.

From design development to final inspection of the printed paper, Transfertex maintains **the highest quality** at every stage, respecting strict European environmental standards and meeting our social responsibilities.

We make every effort to **reduce, reuse and recycle** at every stage, and always have done – quite simply because, from design through production to delivery, it makes both economic and environmental sense.

With subsidiaries in Germany, France, the United States and China, as well as representatives in more than 40 countries, **Transfertex offers a global service and support network.**

REDUCE

No water – Unique dry printing process, so no water pollution or waste.
Print only what you need – Order from 1 to 1,000,000 meters.
Global reach, Local service – We are in 40+ countries and our network of fabric & printing partners means fast service and low transport costs.

REUSE

Reusable cylinders – Designs engraved on reusable cylinders, then reworked in our German factory to strict environmental standards.
Circular design system – We make high-quality, timeless designs: by designing responsibly, our designs are reusable.
Reuse and Share – Discover our design library with our myTFX retail platform.

RECYCLE

Sustainable Paper – We print on FSC-certified paper, responsibly sourced from renewable forests, while used paper is recycled or reused.
Recycled Fabric – Transfer printing is ideal for recycled fabric, and printed garments and textiles can be recycled.
Ink Recycling – Inks are recycled in our factory using our proprietary ink recovery technology.

REDUCE REUSE RECYCLE

ENVIRONMENTALLY & SOCIALLY RESPONSIBLE

Sustainable inks

No hazardous substances or allergenics
Oeko-Tex Standard 100 certificate
ZDHC compliant – zero discharge of hazardous chemicals
Reach compliant – traceability and transparency

Our Process

Closed-loop design & production processes increase sustainability
Zero emissions – clean, dry process with no water or air pollution
State-of-the-art production techniques of environmental excellence
Proven colour matching from sample to production
Official bluesign system partner

Social Responsibility

Fair, ethical and socially-minded
Respectful and secure work environments
Comply with strict European Health and Safety regulations
Apprentice system and training
